

DEAR COLLEAGES,
LADIES AND GENTLEMEN,

Japanese Kampo Medicine is characterized by the clinical administration of experience-based prescriptions of East Asian Medicine. Originating in China, Kampo Medicine has obtained unique features in Japan as a pragmatic complementary therapeutic tool.

Today, Kampo Medicine is well integrated into modern medicine. Extensive scientific data have been achieved in basic and clinical research and a high standard regarding the quality of herbal products has been developed.

Please join us to learn more about authentic Kampo highlights during an inspiring one and a half day-symposium: focusing on traditional knowledge, modern research results and insights from clinical practice

Leading experts from Japan and the West in this field will be happy to present their recent data and will share their clinical experience.

A new format is a practical part on Friday afternoon featuring parallel workshops and discussions with the Kampo masters on difficult clinical cases.

For networking and exchange, we prepared a nice side-program with dinner and music on Friday and a relaxing river boat trip with buffet on Saturday evening while enjoying the medieval town of Hann. Münden.

SYMPOSIUM FEE

The Symposium fee includes full catering and two Dinner Events on Friday and Saturday:

Reduced Fee for ISJKM Members	200€
Regular Fee for Non-Members	215€
Reduced Fee for Students	160€
Symposium-Only without Dinner	125€

REGISTRATION
